

Vision

At VPEMS we believe that each student brings to school a unique contribution which enriches the learning environment to all. We believe a warm supportive school environment in which all children feel welcome and accepted. As a faculty we accept the need to be responsive to the interest, abilities and learning needs of each child.

Education is aimed at intellectual, physical and spiritual goals. We value and strive for open and continuous communication between the school and home.

Readiness to face fearlessly all the problems and challenges
which tomorrow's world will bring them.
